How long is the EMT program?

Our program is approximately 4 months. Our 30 years of experience has shown that a faster course or online course decreases the retention volume needed to move forward to paramedic or nursing programs. The book is over 1,800 pages and does not account for the knowledge obtained at the required skill lab sessions and clinicals. We do occasionally offer a condensed schedule for the participant who has plenty of free time to study and above average learning skills.
